

FLEXIBLE COUPLING

Winflex[®] 9000

www.cmd-couplings.com

Technical description

Flexacier 9000 is an all steel flexible coupling with grid elements.

A compact design for OEM's with a «quick fit» aluminum cast cover and standard hub lengths.

Torques from 950 to 26500 Nm for shaft diameters from 60 to 200 mm.

A robust design that allows shock & vibration absorption and increases the life span of the connected machines.

Long service life (based on CMD instructions for assembly, lubrication & maintenance for flexacier 9000, for an average life between maintenance operations up to 40.000 Hours or 5 years).

Applications

	FS
<i>Agitators, centrifugal fans, pumps & compressors, even load generators...</i>	1*
<i>Rotary compressors, bucket conveyors, rotary pumps, elevators...</i>	1,25
<i>Paper industries, winders/rewinders, light/medium duty conveyors, turbine/gears driven sugar mill stands...</i>	1,50
<i>Hammer mills, light/medium duty cranes, notching press, press, circular sawing machine, scrapers, calanders...</i>	1,75
<i>Small to medium cement kilns, wire mills, uneven load generators, edgers, heavy duty conveyors, rolls, heavy duty cranes, draw & wire benches, shears, sugar knives & crushers, cooling tower fans...</i>	2,00
<i>Strip mills, chippers, ball mills, internal & external mixers, rolling mills, heavy duty cement kilns, furnace feeders, strips, ingot machines...</i>	2,50
<i>Feed rolls, reciprocating pumps & compressors...</i>	3,00

* Only valid for installations with maximum torque less than 1.5 coupling base torque.

Dimensions

[Size 9004]

Item	Designation
1	Cover
2	Paper gasket
3	Fasteners
4	Hub
5	Rubber gasket
6	Grid set

Sizes 9000 to 9016

Horizontal or vertical working position
